

run:

A Java Swing window titled "JframeNoire" with standard window controls (minimize, maximize, close). The window contains the following components:

- Three buttons at the top: "JframeNoire" (white), "jButton1" (blue), and "jButton2" (blue).
- A table with 4 columns and 5 rows. The first row contains the headers "Title 1", "Title 2", "Title 3", and "Title 4". The remaining four rows are empty.
- A large empty rectangular area below the table.
- A radio button labeled "jRadioButton1" on the right side.
- A list box on the right side containing five items: "Item 1", "Item 2", "Item 3", "Item 4", and "Item 5".
- A bottom panel containing:
 - A small button with up and down arrows on the left.
 - An empty text input field.
 - A blue button labeled "jToggleButton1" in the center.
 - A text input field containing ten dots "....." on the right.
